

**Mobile phones 'harm blood cells'**  
Mobile phone radiation may damage cells by increasing the forces they exert on each other, scientists have said.

**Mobile phones 'alter human DNA'**  
Radio waves from mobile phones do harm body cells dan damage DNA, a laboratory study has shown. (Sourced from BBC News)

December 2008 - **Cell phones can affect sperm quality**, researcher says. Keeping a cell phone on talk mode in a pocket can decrease sperm quality, according to new research from the Cleveland Clinic. (Sourced form CNN)

**Mobile phone radiation damages memory : study**  
Exposure to mobile phone radiation worsens the short-term memory of rats, according to a new Swedish study. (Sourced from The Total Sweden's News In English)

**Brain cancer linked to youngsters using cellphone**  
An international group of scientists is calling on Canada and other countries to bring in tougher safety standards for cellphone use after a Swedish team found a fivefold elevated risk of malignant brain tumors in children who begin using mobile phones before the age of 20. (Sourced from Canwest News Service | By : Sarah Schmidt -03/22/09)

**Cell Phone Radiation Effects, Brain Tumors and Children**  
In a meta-analysis published in the May 2008 issue of the International Journal of Oncology, Swedish researchers found significant associations between long-term cell phone use and brain tumor risk. (Sourced from University Hospital, Orebo, Sweden | By: Lennart Hardell -11/06/08)

## 21st Century Product for the safety of your loved ones.

Eneoji BioCerastone EMR Protector is a product of advance Japanese technology and a solution to 21st century harmful electromagnetic waves pollution. Infused with Bio Ceramics capable of emitting Scalar Energy, FIR and Negative Ions, it eliminates and nullifies the harmful effects of electromagnetic waves from our everyday devices. Eneoji BioCerastone EMR Protector is specially designed for easy application and convenient to use on any part of the Mobile phone, TV, Computer, Microwave oven, Refrigerator, Air Conditioner and other electrical appliances. Give yourself the peace of mind knowing that your loved ones are protected against harmful electromagnetic waves and the safety of their health is not compromised.

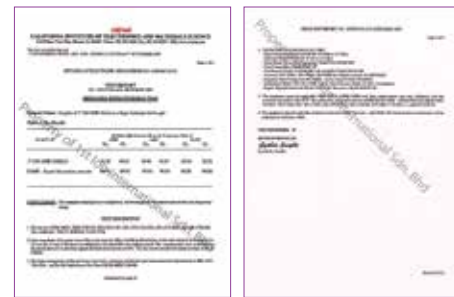

Eneoji BioCerastone strongly advises you to use this on the following devices:

Mobile Phone Television Computer

Refrigerator Air Conditioner Microwave Oven

### How to use:

1. Clean the surface to be pasted on with a piece of cloth.
2. Peel off the sheet behind the Eneoji BioCerastone EMR Protector.
3. Stick on the cleaned surface.
4. Apply even pressure on the Eneoji BioCerastone EMR Protector with thumb to make sure it is properly pasted.

## Eneoji BioCerastone EMR Protector

Mobile phones are a modern day convenience in our society. But, this advance in technology come at a price to human health. Humanity engages various forms of radiation in our everyday life. From microwaves to X-rays, we are surrounded by EMF waves (electromagnetic radiation).

Almost two billion people worldwide (26 million users in Malaysia alone) use cell phones, many of whom are children. This usage represents and unprecedented exposure to electromagnetic radiation in the population. Estimates put EMF radiation exposure at 100 times what it was only a few decades ago.

## Is this safe?

### Dr. George Carlo

Founder of the Safe Wireless initiative.  
A world public Health Authority on cell phones.

“Harm from wireless technology may be even more tragic than global warming. Cell phone radiation can cause genetic damage and even moderate use of wireless communication technology dramatically increases the risk of brain tumors.”

Frequently Asked Questions:

#### 1. What is E.M.R.?

E.M.R. refers to Electromagnetic Radio-frequency Radiation which is the potentially dangerous frequency emitted by cellular or mobile phone. Non-ionizing radiation of lower frequency ionizing forms such as early cell phones were thought to be safe. That view has changed since cell phones and mobile phones have grown in strength from low-level radio waves to high-level microwaves.

#### 2. What is the difference between a Radio Wave and a Microwave?

Radio Waves are low levels of transmission power for signals to and from your phone. These non-ionizing frequencies of radiation are safe. Now mobile phones are 900MHZ to 2.4GIGS or more of power so you do not lose the calls as you travel from room to room or go outside, by your phone is now into Microwaves / infrared waves of radiating power.

#### 3. Are cell phones dangerous?

Several research studies have shown that the radio frequency radiation from wireless phone antennae “appears to cause genetic damage in human blood,” while another case study uncovered a “statistically significant increase” in neuro-epithelial brain tumors among cell phone users. In 2004, a 750-people study by Sweden’s Karolinska Institute found using a mobil phone for 10 years or more increases the risk of ear tumors by four times.

#### 4. Are there any danger signals from excessive cell phone use?

Many users report symptoms like hot phones, headaches, fatigue, tingling sensations and even memory loss. Of course some phones are hotter than others. In a study of teens under 16 years of age, scientists in Europe reported short-term memory loss (up to 50 minutes) after using a cell phone.

Eneoji BioCerastone EMR Protector was developed using Advance Japanese Technology with Bio ceramic materials capable of emitting Scalar Energy, Far Infrared Ray and Negative Ions that eliminates and nullify the harmful effects of Electro Magnetic Radiation thus protecting you and your loved ones from the dangers of radiation from cell phones.

Eneoji BioCerastone EMR Protector will reduce radio frequency radiation over the entire life of your cell phone. Eneoji BioCerastone EMR Protector cannot be transferred to another phone after it is installed, as the 3M bonding we use will no longer work. If a new phone is purchased a new Eneoji BioCerastone EMR Protector must be installed.

For all cell phones, it is placed on the phone itself. The Eneoji BioCerastone EMR Protector should be placed on the back of the phone, the ideal location is where the antennae is located. Since the antennae is not usually near the battery, the best location is the middle portion of the area not occupied by the battery, therefore if the battery is at the bottom you would place the Eneoji BioCerastone EMR Protector in the middle of the top portion.
